## FACTOIDS FOR THE WEEK OF JUNE $4^{\mathrm{TH}}-\mathrm{JUNE} 8^{\mathrm{TH}}$

Monday, June 4, 2007 - Dividend-Payers vs. Non-Dividend Payers In May, the dividend-payers (387) in the S\&P 500 (equal weight) posted a total return of $3.41 \%$, vs. $2.96 \%$ for the non-payers (113), according to Standard \& Poor's. Year-to-date, the payers gained 10.59\%, vs. $10.61 \%$ for the nonpayers. For the 12 -month period ended May 2007, payers gained $23.75 \%$, vs. $20.49 \%$ for the non-payers. The number of dividend increases (S\&P 500) year-to-date totaled 153, lagging the 162 and 163 increases registered over the same period in 2006 and 2005. The dip in dividend increases is most likely a continuation of the use of buybacks. The amount of stock buybacks announced in Q1'07 was $\$ 110$ billion, on pace to match last year's record of nearly $\$ 432$ billion, according to S\&P. The dividend yield on the index was $1.80 \%$ at the close of May.
Tuesday, June 5, 2007 - Oil Exploration \& Production Expenditures
The estimated growth rate for worldwide oil exploration and production expenditures (E\&P) for 2007 was adjusted higher from $9.0 \%$ ( $\$ 291$ billion) at the end of 2006 to $13 \%$ ( $\$ 308$ billion) at the start of June, according to the Lehman Brothers Original E\&P Spending Survey. An increase in international spending (ex-Canada) accounted for all of the upward adjustment. International spending was expected to grow by an estimated 13\% at the start of the year, but that figure has been bumped up to 20\%. Lehman Brothers has set its price target expectations at $\$ 56.90$ for oil and $\$ 6.74$ for natural gas.

## Wednesday, June 6, 2007 - Stocks vs. Real Estate

A new study out by Ken Winans, president of investment research firm Winans International, found that stocks are "superior" investments to real estate over the long term, according to USA TODAY. From 1920 through 2006, the average new home appreciated from $\$ 4,030$ to $\$ 276,400$, or a gain of $6,759 \%$. Over that 86 -year span, the DJIA returned 17,210\%, and that figure does not include dividends. Over the past 20 years, the average new home appreciated $268 \%$, vs. a gain of $1,193 \%$ for the DJIA.
Thursday, June 7, 2007 - Correlations in the Markets
There is currently about an $85 \%$ correlation between the movements of the MSCI EAFE Index and the S\&P 500, according to The New York Times. Asian markets are less correlated to U.S. stocks. Here are a few of those correlations: South Korea ( $67 \%$ ); Hong Kong (55\%); India (43\%); and Japan (29\%). Many of the major European markets are better than $80 \%$ correlated to the S\&P 500. Mexican stocks are at $74 \%$.

Friday, June 8, 2007 — Default Rates
The U.S. speculative-grade default rate was $1.5 \%$ in May, unchanged from its revised level in April, according to Moody's. The global speculative-grade default rate fell from April's upwardly revised $1.6 \%$ to $1.4 \%$ in May. The default rate was $1.8 \%$ a year ago. The default rate on senior loans fell from $0.44 \%$ in April to a new all-time low of $0.29 \%$ in May, according to Standard \& Poor's LCD. The historical average is $3.2 \%$. The senior loan market has been defaultfree for six months.
