

The background of the slide features a complex financial chart. On the left, there is a bar chart with vertical bars of varying heights. Overlaid on this and extending across the right side are several line graphs in shades of blue, purple, and pink. Some of these lines are accompanied by small circular markers and vertical error bars, suggesting data points and their associated uncertainty. The overall aesthetic is modern and data-driven, with a dark blue and purple color palette.

Many investors wonder how a rise in interest rates might impact U.S. stocks and various asset class returns. Since January 20, 2000, there have been 11 periods where the yield on the benchmark 10-year U.S. Treasury Note rose by 1% or more without falling by 0.5%. The following charts and tables consider those periods of rising rates and can help provide some historical perspective.

AVERAGE ANNUAL TOTAL RETURN DURING RISING RATE PERIODS

Rising Rate Period	Change In Rates
11/7/01 – 4/1/02	1.25%
6/10/03 – 9/2/03	1.41%
3/8/04 – 6/14/04	1.10%
6/1/05 – 6/28/06	1.36%
12/18/08 – 6/10/09	1.87%
8/31/10 – 2/8/11	1.27%
7/24/12 – 12/31/13	1.64%
7/5/16 – 3/13/17	1.25%
9/5/17 – 11/8/18	1.18%
8/4/20 – 3/31/21	1.23%
8/2/21 – 6/14/22	2.30%

Past performance is not a guarantee of future results. Source: Bloomberg. Data is daily from 1/20/2000 - 6/30/2022. For illustrative purposes only and not indicative of any actual investment. The illustration excludes the effects of taxes and brokerage commissions or other expenses incurred when investing. These returns were the result of certain market factors and events which may not be repeated in the future. The S&P Indexes are unmanaged, capitalization-weighted indices of stocks used to measure U.S. stock market performance and cannot be purchased directly by investors. The **S&P 500 Index** comprises 500 companies used to measure large-cap U.S. stock market performance. The **S&P 100 Index** is a sub-set of the S&P 500 and comprises 100 major blue chip stocks from a variety of industries. The **S&P MidCap 400 Index** tracks the mid-range sector of the U.S. stock market. The **S&P SmallCap 600 Index** tracks U.S. stocks with a small market capitalization. Value indices measure stocks using three factors: the ratios of book value, earnings, and sales to price. Growth indices measure stocks using three factors: sales growth, the ratio of earnings change to price, and momentum.

HYPOTHETICAL TOTAL RETURNS FOR 1-YEAR PERIOD

Past performance is not a guarantee of future results. Source: Bloomberg, ICE BofA, S&P LSTA. Data as of 6/27/22. The table illustrates hypothetical examples and does not represent the return on any particular investment. Effective duration is used for the preferred index and modified adjusted duration for all others. Duration is a measure of a bond's sensitivity to interest rate changes that reflects the change in a bond's price given a change in yield. Given that senior loans typically pay a floating rate of interest, they tend to have an effective duration of approximately zero. As such, we estimate the duration for senior loans to be approximately 0.25 years. **Bloomberg US Treasury, 5-7 Year Index** - Measures USD-denominated, fixed-rate, nominal debt issued by the US Treasury with 5-6.9999 years to maturity. **Bloomberg US Treasury Bellwethers 10 Yr. Index** - An unmanaged index representing the most recently issued U.S. Treasury bonds with 10 years' maturity. **Bloomberg US Corporate Bond Index** - Measures the investment grade, fixed-rate, taxable corporate bond market. **Bloomberg Emerging Markets (EM) USD Aggregate Bond Index, 5-7 Year** - A flagship hard currency EM debt benchmark that includes fixed and floating-rate US dollar-denominated debt issued from sovereign, quasi-sovereign, and corporate EM issuers. **Bloomberg US Corporate High Yield Bond Index** - Measures the USD-denominated, high yield, fixed-rate corporate bond market. **ICE BofA Fixed Rate Preferred Securities Index** - Tracks the performance of fixed rate USD-denominated preferred securities issued in the US domestic market. **S&P/LSTA US Leveraged Loan 100 Index** - Designed to reflect the performance of the largest facilities in the leveraged loan market. **Bloomberg U.S. Municipal Index** - Covers the USD-denominated long-term tax-exempt bond market of the following maturities: 7 Year (6-8) and Long Bond (22+). **3-, 5-, 10- and 30-Year U.S. Treasuries** - The most recently issued U.S. Treasury bonds or notes of a particular maturity. Indexes are unmanaged and an investor cannot invest directly in an index.
