

The background features a dark blue gradient with several semi-transparent financial charts. There are two line graphs with circular markers, one in orange and one in light blue, showing fluctuating trends. A bar chart with blue bars is also visible. Scattered throughout the background are various numerical values in a light blue font, such as 3852575, 2126548, 4395792, and 4567356. The text 'First Trust' is positioned at the top left of the central text area, with a small square icon containing a white 'F' to its left. The words 'CLIENT RESOURCE KIT' and 'EQUITY' are stacked below it in a large, bold, white sans-serif font.

U.S. GDP: QUARTER-OVER-QUARTER CHANGE (SAAR)

MACRO

Source: First Trust, First Trust, Haver Analytics (historical), Bloomberg (consensus estimates). Q1 2015 to Q2 2024 are actual, Q3 2024 to Q1 2025 are consensus estimates. GDP percent change is on a quarter over quarter seasonally adjusted annual rate (SAAR) basis. There can be no assurance that any of the projections cited will occur. Gross domestic product (GDP) is the monetary value of all finished goods and services made within a country during a specific period.

MACRO

UNEMPLOYMENT RATE (U3)

CHANGE IN TOTAL NONFARM PAYROLLS

Source: First Trust, First Trust, Haver Analytics. Unemployment data from March 2008 - August 2024 (latest data available). Unemployment Rate: 16+ years, seasonally adjusted. Payroll data from January 2015 - August 2024 (latest data available). Seasonally adjusted. April 2020 uses a broken axis since it has an extreme value.

MACRO

Source: First Trust, The Conference Board/Haver Analytics. Data from January 2003 - September 2024. The Consumer Confidence Index is a survey, administered by The Conference Board, that measures how optimistic or pessimistic consumers are regarding their expected financial situation. The Consumer Confidence Index started in 1967 and is benchmarked to 1985 = 100.

CREDIT CARD BALANCES

MACRO

Source: First Trust, Federal Reserve Economic Data (FRED). Weekly data from 1/3/2018 to 9/18/2024 (latest data available). Billions of U.S. dollars, seasonally adjusted. Includes consumer loans: credit cards and other revolving plans, all commercial banks.

MACRO

Source: First Trust, Haver Analytics. Data from January 2015 - September 2024. ISM Manufacturing Index measures manufacturing activity based on a monthly survey, conducted by Institute for Supply Management (ISM), of purchasing managers at more than 300 manufacturing firms. An index reading of more than 50 indicates expansion while a reading of below 50 suggests a contraction of the manufacturing sector.

MACRO

Source: First Trust, Duke University, FRB Atlanta and FRB Richmond, The CFO Survey. March 2006 – September 2024.

MACRO

Source: First Trust, FactSet. Data from January 2008 - August 2024 (latest data available), year-over-year. The **Consumer Price Index (CPI)** is a measure of the average change over time in the prices paid by urban consumers for a market basket of consumer goods and services. Core CPI is CPI minus energy and food prices (categories that tend to be highly volatile).

Source: First Trust, Bloomberg, NAREIT. Diversification does not guarantee a profit or protect against a loss. For illustrative purposes only and not indicative of any actual investment. All indices are unmanaged, statistical composites that cannot be purchased directly by investors. An index does not charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown.

The S&P 500 Growth and S&P 500 Value Indices were used to measure the performance of large-capitalization companies. The Dow Jones U.S. Mid-Cap Growth Total Stock Market Index and Dow Jones U.S. Mid-Cap Value Total Stock Market Index were used to measure the performance of mid-capitalization companies. The Russell 2000 Growth and Russell 2000 Value Indices were used to measure the performance of small-capitalization companies. The MSCI EAFE Index was used to measure the performance of foreign stocks. The NAREIT Composite Index was used to measure the performance of REITs. Small company stocks are more volatile than large company stocks and can be subject to significant price fluctuations. Foreign stocks are subject to additional risks including currency fluctuations, political risks, withholding, the lack of adequate financial information, and exchange control restrictions impacting foreign issuers.

As of 9/30/2024. This example is for illustrative purposes and does not represent any actual investment. We define economic cycles as follows: Recovery – 18 months following the end of a recession. Expansion – time between recovery and late-expansion. Late expansion – last 18 months before peak economic growth. Early recession – start of a recessionary period until 3 months before it ends. Late recession – last 3 months before the economy bottoms. Business cycle dates were sourced from the National Bureau of Economic Research. Data source for performance: Kenneth R. French data library using the CRSP database, July 1963 through May 2022 (for the purposes of this analysis we ended expansion 18 months from the end of late recession). Universe includes all NYSE, AMEX & Nasdaq stocks. Top 30% of stocks by factor are selected. Stocks are then market cap weighted.

FACTOR VALUATIONS: FORWARD PRICE-TO-EARNINGS RATIO

FACTORS

Source: First Trust, Bloomberg & Capital IQ. Monthly data is calculated from 12/31/1999 to 9/30/2024. For illustrative purposes and does not represent any actual investment. The median monthly forward price-to-earnings (P/E) ratio is used for each factor. Each factor is comprised of the top 30% of stocks from a universe of the largest 1,000 U.S. stocks with at least \$1 million dollars in average daily volume over the last 3 months and 12 months of trading history. Value: Lowest price-to-book. Momentum: Highest 12-month price change. Quality: Highest return-on-equity. Size: Lowest market capitalization. Low Volatility: Lowest 1-year price variability. Dividend Yield: Highest dividend yield.

FACTORS

Source: First Trust, Bloomberg & Capital IQ. As of 9/30/2024. Chart shows median next twelve-month EPS growth for each factor group. This chart is for illustrative purposes only and not indicative of any actual investment. Universe: largest 1,000 U.S. firms with \$1 million in average daily volume over the last 3 months and 12 months of trading history. Top 30% of stocks by factor are selected. Stocks are then equally weighted. Earnings per share (EPS) is a company's net profit divided by the number of common shares it has outstanding. Growth rates are based on the next twelve months earnings estimates compared to the trailing twelve months. Value: Lowest price-to-book. Momentum: Highest 12-month price change. Quality: Highest return-on-equity. Size: Lowest market capitalization. Low Volatility: Lowest 1-year price variability. Dividend Yield: Highest dividend yield.
