FALLING RATES

First Trust Portfolios L.P. | Member SIPC | Member FINRA | 1-800-621-1675 | www.ftportfolios.com

In September 2024, the Federal Reserve cut interest rates and indicated that more cuts were likely in the coming months and years. Lowering interest rates reduces borrowing costs, which can stimulate economic growth by encouraging consumers and businesses to spend and invest, ultimately supporting job creation. Observing how stocks and bonds have responded to rate cuts in past cycles can provide valuable historical perspective.

Many investors wonder how a fall in interest rates might impact U.S. stocks and various asset class returns. Since January 20, 2000, there have been 13 periods where the yield on the benchmark 10-year U.S. Treasury Note fell by 1% or more without rising by 0.5%.

The following charts and tables consider periods of falling rates and can help provide some historical perspective.

Falling Rate Period	Trough Date	Change In Rates (From Start to Trough)
1/20/00 - 5/1/00	4/10/00	-1.02%
5/8/00 - 4/19/01	3/22/01	-1.80%
5/15/01 - 11/15/01	11/7/01	-1.33%
3/14/02 - 10/17/02	10/9/02	-1.84%
6/12/07 - 4/24/08	3/17/08	-1.99%
10/14/08 - 1/22/09	12/30/08	-2.02%
4/5/10 - 11/15/10	10/7/10	-1.60%
2/4/11 - 10/14/11	9/22/11	-1.92%
12/24/13 - 3/6/15	1/30/15	-1.34%
6/9/15 - 11/9/16	7/8/16	-1.08%
10/5/18 - 3/17/20	3/9/20	-2.69%
10/19/23 - 2/13/24	12/27/23	-1.20%
4/25/24 - Current*	9/16/24	-1.09%

*As of 9/30/2024, period is ongoing.

HYPOTHETICAL TOTAL RETURNS FOR 1-YEAR PERIOD

Source: First Trust, Bloomberg, ICE BofA, S&P LSTA. Data as of 9/30/2024. **Past performance is not a guarantee of future results.** The table illustrates hypothetical examples and does not represent the return on any particular investment. Effective duration is used for the preferred index and modified adjusted duration for all others. Duration is a measure of a bond's sensitivity to interest rate changes that reflects the change in a bond's price given a change in yield. Given that senior loans typically pay a floating rate of interest, they tend to have an effective duration of approximately zero. As such, we estimate the duration for senior loans to be approximately 0.25 years. **Bloomberg U.S. Treasury, 5-7 Year Index** - Measures USD-denominated, fixed-rate, nominal debt issued by the US Treasury with 5-6.9999 years to maturity. **Bloomberg U.S. Treasury Bellwethers 10 Yr. Index** - An unmanaged index representing the most recently issued U.S. Treasury bonds with 10 years' maturity. **Bloomberg U.S. Corporate Bond Index** - Measures the investment grade, fixed-rate, taxable corporate bond market. **Bloomberg Emerging Markets (EM) USD Aggregate (Agg) Bond Index, 5-7 Year** - A flagship hard currency EM debt benchmark that includes fixed and floating-rate USD-denominated debt issued from sovereign, quasi-sovereign, and corporate EM issuers. **Bloomberg U.S. Corporate High Yield Bond Index** - Measures the USD-denominated, high yield, fixed-rate corporate bond market. **ICE BofA Fixed Rate Preferred Securities Index** - Tracks the performance of fixed rate USD-denominated preferred securities issued in the US domestic market. **S&P/LSTA US Leveraged Loan 100 Index** - Designed to reflect the performance of the largest facilities in the leveraged loan market. **Bloomberg U.S. Municipal Index** - Covers the USD-denominated long-term tax-exempt bond market of the following maturities: 7 Year (6-8) and Long Bond (22+). **3-, 5-, 10- and 30-Year U.S. Treasuries** - The most recently issued U.S. Treasury bonds or notes of a particular maturity. Indexes are unmanaged and an investor cannot invest directly in an index. Index returns do not reflect any fees, expenses, or sales charges.
